EDUCATION

Portland State University

Portland, OR

B.S. in Computer Science

Cumulative GPA: 3.68 | Major GPA: 3.94

TECHNICAL SKILLS

Languages: C++, Python, C, TypeScript, Java, C#, Next.js, PostgreSQL

Frameworks: Next.js, React Native, Tailwind CSS

Tools: Git, Linux, Docker, Jenkins, JIRA, VS Code, PyTest

EXPERIENCE

Software Quality Assurance Engineer Intern

Mar 2026 – Present

Teledyne FLIR

Wilsonville, OR

- Support **CI/CD** workflows by retrieving and validating software builds from **Bitbucket** and **Jenkins** for deployment onto **embedded devices**.
- Execute system-level testing on electro-optical and infrared imaging devices, identifying failures and collaborating with developers to resolve build and integration issues.
- Analyze system logs, validation results, and device-level failures to isolate issues, create detailed **JIRA** tickets, and support root cause analysis for mission-critical software.
- Maintain and enhance technical documentation in **Confluence**, ensuring clear and reliable procedures for system setup and validation by external stakeholders.
- Deploy and validate software builds from **Jenkins** and **Bitbucket** onto embedded devices used in **government-contracted systems**, ensuring release readiness and configuration consistency.

Software Engineering Research Assistant – DIPr Lab

Jun 2025 – Sep 2025

Portland State University

Portland, OR

- Designed and implemented a points-based progression system for **myPals**, tracking user XP across multiple mini-games.
- Developed backend logic to manage user activity and progression while enforcing constraints to prevent reward exploitation and maintain educational intent.
- Collaborated with research mentors to refine system behavior, balancing engagement mechanics with privacy-focused learning outcomes.
- Contributed to frontend development by building a responsive landing page, including character introductions and interactive UI elements for a child-friendly experience.
- Enhanced user interaction through UI improvements such as hover effects and structured content presentation.

LEADERSHIP

Social Media Director – National Society of Black Engineers (NSBE)

Dec 2024 – Present

Portland State University

Portland, OR

- Manage and maintain NSBE social media platforms (Instagram, Facebook) to promote events and increase student engagement.

PROJECTS

CM Banh Mi Website | *Next.js, TypeScript, Node.js, PostgreSQL*

May 2025 – Present

- Collaborated with a local business to design and develop a full-stack web application supporting menu display, order placement, and transaction workflows.
- Implemented a backend system to track user activity, including purchase history and spending behavior, enabling a dynamic loyalty and rewards program.
- Design and integrate a **PostgreSQL** database to manage menu data, user accounts, order records, and feedback submissions.
- Developed **RESTful APIs** to handle user authentication, order processing, and feedback collection, ensuring reliable data flow between frontend and backend.
- Incorporated user feedback mechanisms and iterated on features to improve usability and system functionality.

Portfolio Website | *Next.js, HTML, Tailwind CSS*

Dec 2024 – Jan 2025

- Developed a responsive personal website to showcase projects, technical experience, and background across mobile, tablet, and desktop platforms.
- Implemented dynamic UI components, including a slideshow feature, using **Tailwind CSS** for consistent styling and performance.
- Integrated form-based communication workflow to collect user messages and contact information for direct follow-up.
- Optimized cross-browser compatibility and responsive layouts to ensure consistent user experience across devices.
